## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-4, drawn to a pivotal mount for a lamp assembly, classified in Class 362, Subclass 269.

Group II. Claims 5-13, 28-35, 36-50, drawn to a cooling system for a lamp assembly, classified in Class 362, Subclass 373.

Group III. Claims 14-27, drawn to a lamp with optical subassembly mount, classified in Class 362, Subclass 368.

2. The inventions are distinct, each from the other because of the following reasons:

3. Invention Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Groups I, II, and III respectively have separate utility such as a pivotal mount, cooling system, or an optical subassembly mount, all of which can be individually incorporated into a lamp system.

See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2875
